## Out of this world

**Above:** In the Gulf of Guinea, the southwestern seasonal monsoon blows toward North Africa while gathering humidity and moisture. Chinese astronaut Senior Colonel Tang Hongbo shot this photo from the Tiangong space station while completing routine training on July 21. Tang, along with Major General Nie Haisheng and Major General Liu Boming, entered the core module of China's space station, named Tianhe, or Harmony of Heavens, on June 17, after their Shenzhou XII spaceship linked with the module.

**Right:** The weather above the Indian Ocean is as complicated as always in this photo shot by Chinese astronaut Tang Hongbo on Aug 13.

Both photos were released on Tuesday.
