MBRSC reaffirms role as Nasa halts lunar project

Centre focused on contributing to human presence on Moon

DUBAI

BY NATHANIEL LACSINA

Senior Web Editor

The UAE's Mohammed Bin Rashid Space Centre (MBRSC) has reaffirmed

its commitment to the Artemis programme and its partnership with Nasa, following the agency's decision to pause the Lunar Gateway project, highlighting the country's continued focus on advancing its lunar capabilities.

MBRSC emphasised that it continues to advance its own lunar capabilities and remains focused on contributing to

long-term human presence on the Moon.

The centre highlighted the UAE's sustained ambition in space exploration and its role in shaping lunar missions in the future.

MBRSC, established in 2006, is a leading scientific and technological hub driving the UAE's leadership in space services and exploration.
