Isro: Drift between satellites arrested

Isro on Thursday said it has arrested the drift between satellites during its ambitious Space Docking Experiment (SpaDeX) and put the spacecrafts in a slow drift course to move closer to each other. According to the space agency, the experiment is expected to reach initialisation condition on Friday. "SpaDeX Docking Update: The drift has been arrested and spacecrafts put in a slow drift course to move closer to each other. By tomorrow, it is expected to reach initialisation conditions," Isro said in a statement.
