■ Sultan Al Neyadi wears the Bio-Monitor smart shirt and headband that gauge the body's response to microgravity.

Al Neyadi wears 'Astroskin', hails it as a 'game-changer'

The high-tech garment monitors vital health stats

DUBAI

UAE astronaut Sultan Al Neyadi, currently on the longest Arab space mission aboard the International Space Station (ISS), yesterday showcased a special Bio-Mon-

itor smart shirt or "Astroskin" and headband. The high-tech garments monitor vital health stats, including heart rate and blood pressure, providing valuable insights into the body's response to microgravity.

"This technology can be a game-changer for remote health care," Neyadi said.

Developed by the Canadian Space Agency (CSA), it has already been used to enhance sports performance by elite athletes.
